

Hamaton | How to Perform an OBDII Relearn with the H47 TPMS Tool

Choose SERVICE TPMS on the main menu

Select the vehicle's MAKE

Select the vehicle's MODEL

Select the vehicle's YEAR OF MANUFACTURE

Choose OBDII RELEARN

Take a glance at the instructions

Select the number of wheels (if applicable)

Start with the LF (left front) tire

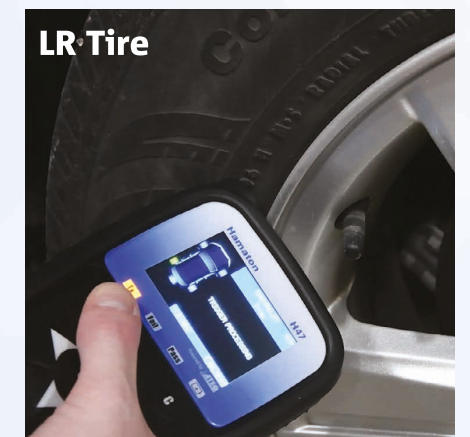

Place the tool on the sidewall near the valve, then press the green trigger button

Repeat for the RF (right front) tire

Repeat for the RR (right rear) tire

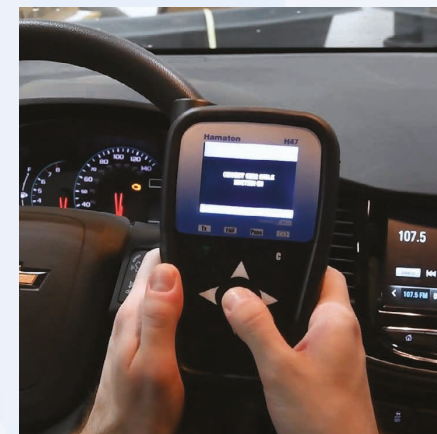

Repeat for the LR (left rear) tire

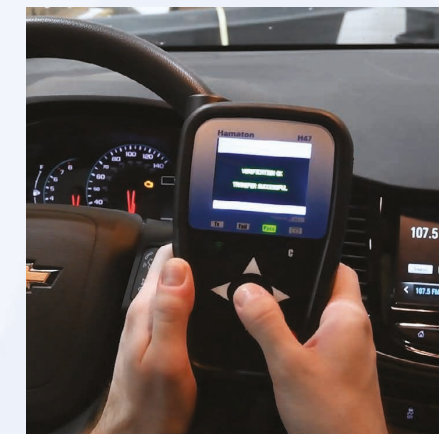

Plug in the connector to the vehicle's OBDII port

Connect the opposite end of the OBDII connector to the tool

Press OK with the ignition ON

The tool will display TRANSFER SUCCESSFUL if the relearn was a success
